#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 29 rejected under 35 U.S.C. 102(b) as being anticipated by Nita (USPN 5,267,954).

Nita discloses a catheter comprising, a first tube having a lumen closed at its distal end and sized to receive the treating element, a second tube in parallel relation to the first tube and having a lumen open at its distal end and sized to receive a guidewire, and a third tube for receiving first and second tube and having a fluid return lumen in fluid communication with the lumen of the first elongated tube and wherein the third tube is closed (See Figure 6, 6b).

3. Claims 29-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Weaver et al. (USPN 5, 843, 028).

Weaver et al. discloses a catheter comprising, a first tube having a lumen closed at its distal end and sized to receive the treating element, a second tube in parallel

Art Unit: 3763

relation to the first tube and having a lumen open at its distal end and sized to receive a guidewire, and a third tube for receiving first and second tube and having a fluid return lumen in fluid communication with the lumen of the first elongated tube.

Where the distal end of the third tube (as shown in figure 23) extends beyond the distal ends of the first and second tubes (Figures 6, 13B, 23 and entire reference).

4. Claims 29-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Harrison et al. (USPN 5,554,119).

Harrison et al. discloses a catheter comprising, a first tube (172) having a lumen partially closed at its distal end and sized to receive the treating element, a second tube (32) in parallel relation to the first tube and having a lumen open at its distal end and sized to receive a guidewire, and a third tube (164) for receiving first and second tube and having a fluid return lumen in fluid communication with the lumen of the first elongated tube. (Figure 3B, and entire reference)

## **Double Patenting**

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Application/Control Number: 10/817,549 Page 4

Art Unit: 3763

6. Claims 29-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11, 12, 17, 19, 20, 22, 35, of U. S. Patent No. 5,899,882. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent and the application are claiming common subject matter, as follows: a first, second and third tube with a treating element placed in one of the tubes and the only variation is an obvious modification, which is the reinforcing connector. The application has the same principle, but never positive recites the reinforcing connector.

7. Claims 29-32 of this application conflict with claim29-35, 37, 42-44, 47-49 of Application No. 09/468,496. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew F DeSanto whose telephone number is 1-703-305-3292. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick LUCCHESI can be reached on (703) 308-2698. The fax phone
